

RACHMAT MAULANA SALEH

ENGINEERING MANAGER; FULL-STACK ENGINEER; AI ENGINEER;

PROFESSIONAL SUMMARY

Engineering Manager with 10+ years of experience leading end-to-end software development mulai dari sistem frontend hingga backend. Memiliki keahlian yang kuat dalam pelaksanaan teknis, penerapan arsitektur, dan people management. Telah terbukti mampu menghasilkan sistem yang scalable, high-quality, sekaligus membimbing tim dan menerapkan engineering best practices.

Engineering Manager with 10+ years of experience leading end-to-end software development across frontend and backend systems. Strong in technical execution, architecture enforcement, and people management. Proven ability to deliver scalable, high-quality systems while mentoring teams and establishing engineering best practices.

CORE COMPETENCIES

- ★ Technical Leadership & System Design
- ★ People Management & Team Mentoring
- ★ Architecture Enforcement (Hexagonal / Clean Architecture)
- ★ Code Quality & Engineering Standards
- ★ Agile Delivery & Task Planning
- ★ Performance & Reliability Optimization

ENGINEERING STANDARDS & CHECKLIST

- ✓ Code quality, readability, and maintainability
- ✓ Architecture consistency and proper boundary enforcement
- ✓ Testing strategy (unit, integration, performance)
- ✓ Performance and scalability considerations
- ✓ Inclusive and user-friendly UI implementation
- ✓ Deployment readiness, monitoring, and alerting

ABOUT ME

No alcohol; No smoking; YOB 1988; Occasionally playing FIFA and Mario Party with my daughter.

📍 Pasar Manggis, Setiabudi, Jakarta Selatan 12970

TOOLS & TECHNOLOGIES

Engineering & Development:

Node.JS, Next.js, React, Ruby on Rails, Laravel, Typescript, Golang, REST API, GraphQL, Hexagonal Architecture, Queued Jobs, Scheduled Jobs.

Testing & Quality:

JMeter, Postman, PHPUnit, Jest, Rspect, Capybara, Playwright.

DevOps & Infrastructure:

Docker, Nginx, Linux (Ubuntu), CI/CD (GitHub Actions, GitLab CI), AWS, HuaweiCloud.

Database & Caching:

MySQL, PostgreSQL, Redis, SOLR.

Collaboration & Management:

Jira, Trello, Confluence, Notion, Slack.

Design & UI Collaboration:

Figma, Adobe XD.

Monitoring & Observability:

Sentry, logging & alerting systems.

PROFESSIONAL EXPERIENCE

FULLSTACK DEVELOPER

FREELANCE 2025–PRESENT

- I work on several confidential projects under third-party agreements. I am responsible for adding new features and maintaining existing systems.
- Saya mengerjakan beberapa proyek yang bersifat confidential berdasarkan perjanjian dengan pihak ketiga. Saya bertanggung jawab untuk menambahkan fitur baru dan memelihara sistem yang sudah ada.

Engineering Manager | FullSTACK DEVELOPER

Carro GROUP | 2015–2025

- Auksi.co.id - Led resolution of a critical performance bottleneck on the auction platform by restructuring the database and rewriting inefficient legacy queries, significantly improving system responsiveness; Took ownership of backend architecture improvements to ensure scalability and reliability under growing transaction volume; Designed and shipped new features such as Membership, Unit Pickup, BPKB Pickup, and Deposit Transfer.
Tech Stack: Laravel, NextJs, Typescript, Mysql, Redis, AWS, Ubuntu Server, NodeJs, BackgroundJob, ScheduledJob, Docker, Materialize Table, Idempotency.
- Jualo.com - Joined as the first employee and helped build the engineering team from the ground up; Architected and delivered critical systems including user onboarding & authentication, product listing, search, checkout, payment, shipment, and dispute resolution.
Tech Stack: Ruby on Rails, ReactJs, Typescript, Mysql, Redis, Solr, AWS, Ubuntu Server, NodeJs, BackgroundJob, ScheduledJob, Docker, Materialize Table, Idempotency.

TECHNICAL LEAD

ABRARESTO.COM | 2013–2015

- Led resolution of a Critical mobile performance bottleneck by rebuilding the mobile web experience from scratch; Redirected mobile traffic to the new site, significantly improving performance; Implemented Sphinx-based search to enhance restaurant discovery, improving search speed and relevance.
- **Tech Stack: Ruby on Rails, JQuery, Mysql, Memcached, Ubuntu Server, Sphinx, BackgroundJob, ScheduledJob.**

FULLSTACK DEVELOPER

FREELANCE 2011–2013

- Built and delivered custom web applications for SME clients.
- Managed end-to-end development lifecycle.
- **TechStack: CodeIgniter, Ruby on Rails, Drupal, WordPress, MySQL.**

TECHNICAL PROJECT MANAGER

WGS / KIRANATAMA | 2009–2011

- Managed multiple web projects (Drupal, WordPress) from planning to delivery.
- Coordinated between stakeholders and engineering teams.
- **TechStack: Wordpress, Drupal, MySQL.**

PHP ZEND FRAMEWORK DEVELOPER

VTRAINING.COM | 2008–2009

- Developed financial reporting modules for enterprise systems.
- **TechStack: PHP Zend Framework, PostgreSQL, JQuery.**

EDUCATION

GRADUATED IN HIGH SCHOOL IN 2006

SELF-TAUGHT SOFTWARE ENGINEER; Continuous learning via online courses and hands-on experience.

CAREER JOURNEY

I started my career in technology in 2007 after high school, beginning with web development and joining an IT consultancy in 2008 to build financial report systems for government institutions. I later worked with international clients, taking on both development and project management responsibilities. After a period as a freelance full-stack developer, I became a Technical Lead at Abraresto.com (2014–2015), and in 2015 joined Jualo.com (Carro Group) as an Engineering Manager. Most recently, I resolved critical performance issues in the Auksi auction platform by optimizing data structures and database queries.

Saya memulai karier di bidang teknologi pada tahun 2007 setelah lulus SMA, dimulai dari web development dan bergabung dengan konsultan IT pada tahun 2008 untuk membangun sistem laporan keuangan bagi institusi pemerintah. Selanjutnya, saya bekerja dengan klien internasional, mengambil peran dalam pengembangan sekaligus manajemen proyek. Setelah periode sebagai freelance full-stack developer, saya menjadi Technical Lead di Abraresto.com (2014–2015), dan pada tahun 2015 bergabung dengan Jualo.com (Carro Group) sebagai Engineering Manager. Terakhir, saya berhasil menyelesaikan isu performa kritis pada platform lelang Auksi dengan mengoptimalkan struktur data dan query database.

PROGRAMMING LANGUAGES

I have professional experience working with Laravel, Ruby on Rails, TypeScript, and JavaScript. I am confident in my ability to quickly adapt and contribute to projects using other technologies such as Go or Spring Boot, as Go has a simple and clear syntax, and Java (used in Spring Boot) shares similarities with TypeScript, which I use professionally.

Saya memiliki pengalaman profesional menggunakan Laravel, Ruby on Rails, TypeScript, dan JavaScript. Saya yakin dapat dengan cepat beradaptasi dan berkontribusi pada proyek yang menggunakan teknologi lain seperti Go atau Spring Boot, karena Go memiliki sintaks yang sederhana dan jelas, serta Java (yang digunakan dalam Spring Boot) memiliki kesamaan dengan TypeScript yang sudah saya gunakan secara profesional.

AI-ASSISTED ENGINEER & AI ENGINEER EXPERIENCES

In my latest project, I had not yet used AI assistance. However, today we should leverage AI to accelerate software development. **I'm confident in vibe coding and AI-assisted programming because I understand the fundamentals and have hands-on experience in every stage of the development process.**

Here is my portfolio demonstrating my experience as an **AI engineer** integrating free LLMs into an English quiz website. It also showcases my experience as an **AI-assisted engineer**, where I completed the website without writing the code myself, but instead by providing complete instructions to AI coding agents. This project was completed within one hour: <https://v0-web-study-companion.vercel.app>, and AI Logo Generator completed within 16hrs : <https://rchmt-porto1.vercel.app/> - <https://github.com/rachmatm/sturdy-doodle>

Pada proyek terbaru saya, saya belum menggunakan bantuan AI. Namun saat ini, kita sebaiknya memanfaatkan AI untuk mempercepat pengembangan perangkat lunak. **Saya percaya diri dalam vibe coding dan pemrograman berbantuan AI karena saya memahami fundamentalnya dan memiliki pengalaman langsung di setiap tahap proses pengembangan perangkat lunak.**

Berikut adalah portofolio saya yang menunjukkan pengalaman saya sebagai **AI engineer** dalam mengintegrasikan LLM gratis ke dalam website kuis bahasa Inggris. Portofolio ini juga menunjukkan pengalaman saya sebagai **AI-assisted engineer**, di mana saya menyelesaikan website tersebut tanpa menulis kode secara manual, melainkan dengan memberikan instruksi yang komprehensif kepada AI coding agents. Development website kuis bahasa Inggris ini berhasil diselesaikan dalam waktu satu jam saja: <https://v0-web-study-companion.vercel.app>, dan AI Logo Generator selesai dalam 16 jam : <https://rchmt-porto1.vercel.app/> - <https://github.com/rachmatm/sturdy-doodle>
